2 FEATURES OF LCK SERIES

Gear units of series LCK replicate in the right angle layout the brilliant features that are already typical of the in-line products of the LC series, with the additional benefit of a facilitated installation in tight spaces.

- Available in one only backlash option, corresponding to following values:
 double reduction gearheads: $\varphi_S = 6'$
 triple reduction gearheads: $\varphi_S = 8'$
- Degree of protection IP64
- Oil seals from Viton® compound as standard
- Max. noise level $L_P \leq 70$ dB(A) @ $n_1 = 3000$ min⁻¹
- Wide range of adapter flanges matching the most popular brands of motors
- Units are factory filled with synthetic grease to NLGI consistency class 00, suitable for installation in any mounting position and at ambient temperature within the range 0°C...40°C.
 In the absence of contamination the lubricant does not require periodical changes.
